

AuPS Webmaster's report
March 2010

With the assistance of Dave Davey at IT manage, the WEB site and server system has run very during 2009. The quality of the AuPS web site and the strength of its conference registration and payment systems has been noticed by a number other societies. During 2009, the AuPS web site has hosted the web site and registration and payment systems for Autonomic Neuroscience Society satellite meeting in Newcastle 2009. The AuPS registration system was also used by the Australian Society for Biophysics in 2009 and is being used by the Curtin conferences to be held in 2010. As webmaster, my main activities have been to keep the WEB site up to date and to construct the conference pages for the AuPS meetings. Peak activity occurred for me in the lead-up to each conference and the month following each meeting. My 4 year term as webmaster has now finished and the webmaster post is now being held by Dr Annick Anselin.
