

AuPS Editor's Report January 2010

AuPS Proceedings for 2008 Annual Scientific Meeting: All abstracts from the 2008 Annual Scientific Meeting in Melbourne were published in volume 39 of the Proceedings of the AuPS. In addition, we published 15 invited mini reviews from the meeting in the volume 40 of the Proceedings. These reviews have also been published in the journal Current Experimental Pharmacology and Physiology (CEPP) in 2009.

Abstracts for 2010 ANS/AuPS: Due to the nature of this meeting, all abstracts submitted to this meeting went through the meeting website. To the credit of Dave Davey, we have been able to identify abstracts from AuPS members and publish them in volume 40 of the AuPS Proceedings. This was not an easy or simple task and I wish to sincerely apologise if we have overlooked an abstract from one of our AuPS members.

This will be my last report as Editor of the AuPS. I would like to express my sincere gratitude to all AuPS members and the AuPS council for your support, which has made my task enjoyable. I also wish to especially thank Dave Davey who has been tireless in helping me producing Proceedings, etc. To know that Dave will assume the Editor's position will allow me to leave this post confident that it will go to most capable hands.
