PROCEEDINGS OF THE AUSTRALIAN PHYSIOLOGICAL SOCIETY

Volume 38

2007

Correspondence

Correspondence concerning literary and technical aspects of the journal should be addressed to the Editor. Correspondence concerning subscriptions to the journal should be addressed to the Treasurer and that involving all other Society business should be addressed to the National Secretary.

AUSTRALIAN AUSTRALIAN PHYSIOLOGICAL SOCIETY INC.

President:	D.J. Adams (2004-) School of Biomedical Sciences University of Queensland St. Lucia Queensland 4072
National Secretary:	D.A. Saint (2002-7) Molecular and Biomedical Sciences University of Adelaide Adelaide SA 5005
Treasurer:	S. Bröer (2006-) School of Biochemistry & Molecular Biology Australian National University ACT 0200
Editor:	A. Dinudom (2006-) Discipline of Physiology School of Medical Sciences University of Sydney NSW 2006
Associate Editor:	T. Lewis (2006-) Department of Physiology and Pharmacology School of Medical Sciences University of New South Wales NSW 2052
Webmaster:	D.R. Laver (2005-) School of Biomedical Sciences University of Newcastle NSW 2308
IT Manager:	D.F. Davey (2006-) D'Entrecasteaux Kettering Tasmania 7155

Elected Members of Council (Year of retirement in parentheses)

E. Porrello	(2007)	University of Melbourne (Student representative)
G. Lamb	(2008)	La Trobe University
G. Lynch	(2008)	University of Melbourne
P. Poronnik	(2008)	University of Queensland
L. Hool	(2009)	University of Western Australia
G. Posterino	(2009)	La Trobe University
J. Vandenberg	(2009)	Victor Chang Cardiac Research Institute

PROCEEDINGS OF THE
AUSTRALIAN PHYSIOLOGICAL SOCIETY

Volume 38

2007

CONTENTS

AuPS/Combio Brisbane 2006 Meeting

Symposium: Development and Physiological Adaptions of Neuronal Circuits and Synapses I

Glutamate receptor plasticity at excitatory synapses in the brain

D. Genoux and J.M. Montgomery 1

Inhibitory interneurons in the piriform cortex

N. Suzuki and J.M. Bekkers 9

Does spike-timing-dependent synaptic plasticity underlie memory formation?

J.J. Letzkus, B.M. Kampa and G.J. Stuart 15

Functions of SK channels in central neurons

E.S.L. Faber and P. Sah 25

Symposium: The environment and genome in development: signalling from the beginning

Intracellular calcium in the fertilization and development of mammalian eggs

K.T. Jones 35

Symposium: Molecular determinants of calcium signalling

Ca²⁺ signaling and early embryonic patterning during zebrafish development

S.E. Webb and A.L. Miller 43

Symposium - Environmental and genetic influences on respiratory health

The roles of α_{1A} - and α_{1B} -adrenergic receptors in heart: insights from studies of genetically modified mice

E.A. Woodcock 53

Ca²⁺ stores regulate ryanodine receptor Ca²⁺ release channels via luminal and cytosolic Ca²⁺ sites

D.R. Laver 59

Plenary Lecture

Age-related changes in the structure and function of skeletal muscles

J.A. Faulkner, L.M. Larkin, D.R. Claflin and S.V. Brooks 69

Symposium: Endocrinology

Involvement of somatostatin receptor subtypes in membrane ion channel modification by somatostatin in pituitary somatotropes

S.-K. Yang and C. Chen 77

Symposium: Regulation of membrane transport

Evidence for the regulation of L-type Ca^{2+} channels in the heart by reactive oxygen species – mechanism for mediating pathology

L.C. Hool..... 87

Regulation of epithelial Na^+ channels by aldosterone: Role of Sgk1

I-H. Lee, C.R. Campbell, D.I. Cook and A. Dinudom..... 95

Plenary Lecture

The epithelial brush-border Na/H Exchanger NHE3 associates with the actin cytoskeleton by binding to ezrin directly and via PDZ domain containing NHERF proteins

B. Cha and M. Donowitz..... 105

AuPS/ASB 2007 Newcastle Meeting Abstracts

AuPS Symposium: Physiology education

Developing research and inquiry through undergraduate education

S. Barrie 1P

Models of research-led learning and the theoretical and practical considerations in diverse contexts

R.W. Moni 2P

Research skill development in practical course work: a cost benefit view

D.A. Saint and L. Rogers 3P

Creating the student-research nexus in research-led learning

L.M.D. Delbridge 4P

U.S. National Institutes of Health program: Fostering research at predominantly undergraduate institutions

B.E. Goodman 5P

Plenary Lecture - Mike Sanguinetti

Modifiers of hERG K^+ channel gating

M.C. Sanguinetti, D. Fernandez and M. Perry 6P

Symposium: Protein structure, interactions and dynamics

CLIC proteins: chameleon proteins at the interface between membranes and the cytoskeleton

D.R. Littler, S.J. Harrop, L.J. Brown, G.J. Pankhurst, A.V. Mynott, J. Phang, P. Luciani, R.A. Mandyam, M. Mazzanti, S. Tanda, M.A. Berryman, S.N. Breit and P.M.G. Curmi 7P

Interactions of human profilin-1 and phosphatidylinositol 4,5-bisphosphate in giant unilamellar vesicles

K. Krishnan, S.H. Cody, A.H.A. Clayton and P.D.J. Moens 8P

New twists in old tales. Conotoxins targetted to sodium channels

R.S. Norton 9P

Dimers are forever: New developments in the mechanism of the Na^+, K^+ -ATPase

R.J. Clarke 10P

TRPC1 is increased in mdx muscle, binds to caveolin-3 and is regulated by Src kinase: implications for Duchenne muscular dystrophy

O.L. Gervasio, N.P. Whitehead and D.G. Allen..... 11P

<i>In the presence of ATP, acidosis markedly inhibits CLC-1 skeletal muscle chloride channels</i> B. Bennetts, M.W. Parker and B.A. Cromer	12P
---	-----

Free communications: Skeletal muscle 1

<i>Properties of the tubular system network in twitch muscle</i> J.N. Edwards, P. Bhat, P. Thorn and B.S. Launikonis.....	13P
--	-----

<i>An action potential activated Ca^{2+} current in skeletal muscle</i> B.S. Launikonis, E. Rios and D.G. Stephenson	14P
--	-----

<i>A slowing of relaxation in EDL muscle from the genetically obese mouse is associated with alterations in SR Ca^{2+} handling</i> R. Blazev, J.G. Kemp, D.G. Stephenson and G.M.M. Stephenson.....	15P
--	-----

<i>The effects of acute and chronic central leptin infusion on metabolism in peripheral tissues</i> R.C. Laker, G.D. Wadley, I.J. Clarke, B. Canny and G.K. McConell.....	16P
--	-----

<i>Effects of the inflammatory agent carrageenan on contractile function in mammalian skeletal muscle</i> G.J. Pinniger, J.E. Pelham and A.J. Bakker	17P
---	-----

<i>LDH isozyme profile of striated muscles and electrophoretically-typed single fibres from cane toad (Bufo marinus)</i> J.R. Babb, R. Blazev, J.G. Kemp and G.M.M. Stephenson	18P
---	-----

<i>MuRF1 and Nedd4 are differentially expressed in denervated rat fast- and slow-twitch muscles</i> J.G. Ryall and G.S. Lynch.....	19P
---	-----

<i>Local insulin-like growth factor binding proteins are required for successful skeletal muscle regeneration after injury</i> S.M. Gehrig, J.D. Schertzer and G.S. Lynch	20P
--	-----

Symposium: Magnetic techniques in protein studies

<i>Application of CW and pulsed EPR, MoSophe and DFT calculations in unravelling the electronic structure of the molybdenum(V) centre in dimethylsulfoxide reductase</i> C.J. Noble, S. Drew, I. Lane, S. Benson, A.G. McEwan, C.G. Young and G.R. Hanson.....	21P
---	-----

<i>Using NMR to study kinase regulation</i> G.F. King	22P
--	-----

<i>Boltzmann-statistics analysis of solid state NMR experiments</i> J.D. Gehman, F. Separovic and A.K. Mehta	23P
---	-----

<i>Chiral selection in metabolism studied by NMR of anisotropic media</i> P.W. Kuchel, C. Naumann, D. Szekely and W.A. Bubb.....	24P
---	-----

<i>Enhanced protein stability through disulfide engineering</i> T.D. Mulhern, T.W. Qiu, M.J. Bird, K. Ia, H.C. Cheng and O. Tan.....	25P
---	-----

<i>Dynamics of the troponin molecular switch in the thin filament using SDSL-EPR</i> J.A. Cooke, P.M.G. Curmi and L.J. Brown.....	26P
--	-----

Symposium: Calcium channels, microdomains and muscle function

<i>Store operated Ca^{2+} channels and microdomains of Ca^{2+} in liver cells</i> G.J. Barritt, T.L. Litjens, J. Castro, E. Aromataris and G.Y. Rychkov	27P
<i>Store-operated Ca^{2+} entry and TRPC expression; possible roles in control of heart rate</i> Y-K. Ju and D.G. Allen	28P
<i>What's where and why at a vascular myoendothelial signaling complex?</i> S.L. Sandow	29P
<i>Location of voltage dependent calcium channel subtypes controls different aspects of cerebrovascular function</i> C.E. Hill, M.F. Navarro-Gonzalez, K.R. Meaney and T.H. Grayson.....	30P
<i>Imaging and modelling calcium microdomains around individual and clustered channels</i> I. Parker, A. Demuro, J.W. Shuai and I. Smith	31P

Student symposium: Life after a PhD

<i>Establishing a career in science: the early postdoctoral years</i> M.J. Watt	32P
<i>Life after the Ph.D.: applying for jobs and establishing your career</i> G.S. Lynch.....	33P

Symposium: Potassium channels

<i>Location and function of SK channels in pyramidal neurons in the amygdala</i> P. Sah, L. Faber and A. Delaney	34P
<i>Potassium channel gating</i> J.M. Gulbis	35P
<i>A link to two-pore domain potassium channel regulation</i> C.E. Clarke, E. Veale, A. Mathie, K. Wyse, A. Torres, G. Pages, P.W. Kuchel and J.I. Vandenberg	36P
<i>Mapping the insectophore of κ-atracotoxins: insect-selective BK_{Ca} channel blockers that reveal a novel insecticide target</i> S.J. Gunning, F.J. Maggio, S.M. Valenzuela, G.F. King and G.M. Nicholson	37P

Symposium: Insulin signaling in health and disease

<i>Molecular mechanisms underpinning enhanced insulin action by prior exercise</i> J.F.P. Wojtaszewski	38P
<i>Planet Akt. Are there alternate life forms in the insulin action galaxy?</i> D.E. James.....	39P
<i>The retinoic acid receptor-related orphan nuclear receptor α regulates adiposity and lipid homeostasis</i> P. Lau, R. Fitzsimmons, S. Suryaparakash and G.E.O. Muscat.....	40P
<i>Skeletal muscle fat metabolism and insulin resistance: old targets, new players</i> M.J. Watt	41P

Bob Robertson Lecture

ASB AGM

Symposium: Exercise, free radicals and skeletal muscle

Redox modulation of contractile function in skeletal muscle

M.B. Reid 42P

Influence of skeletal muscle ROS production on excitation-contraction coupling at physiological temperatures

C. van der Poel, J.N. Edwards, W.A. Macdonald and D.G. Stephenson 43P

Skeletal muscle Na^+ , K^+ -pump activity, reactive oxygen species and fatigue in exercising humans

M.J. McKenna 44P

Role of reactive nitrogen species in skeletal muscle glucose uptake and mitochondrial biogenesis

G.K. McConell 45P

Symposium: TRP and the other channels

A TR(I)P through the world of epithelial calcium and magnesium channels

R.J.M. Bindels 46P

Conformational variability of the glycine receptor M2 domain in response to activation by different agonists

J.W. Lynch, S.A. Pless, M.I. Dibas and H.A. Lester 47P

Molecular components of store-operated Ca^{2+} entry in liver cells

G.Y. Rychkov 48P

Free communications: Skeletal muscle 2

The variably spliced ASI region of RyR1 contains a basic α -helix domain that modifies EC coupling

A.F. Dulhunty, T. Kimura, J.D. Lueck, P.J. Harvey, S.M. Pace, N. Ikemoto, M.G. Casarotto and R.T. Dirksen 49P

Reduced Ca^{2+} -activated force explains increased skeletal muscle fatigability in heart failure

E. Verburg, M. Munkvik, P.K. Lunde, G.D. Lamb and O.M. Sejersted 50P

Transgenic expression of cardiac α -actin rescues the lethal phenotype of skeletal α -actin knockout mice

G. Ravenscroft, K.J. Nowak, C. Jackaman, E.M. Lim, P.J. Morling, L.M. Griffiths, V. Fabian, J.L. Lessard, A.J. Bakker, K.E. Davies and N.G. Laing 51P

Contractile and fatigue properties of α -actinin-3 knockout fast-twitch EDL muscle

S.I. Head, S. Chan, D.G. Mac Aurther and K.N. North 52P

Higher expression of caveolin-3 in mechanically-skinned single fibres from slow-twitch muscle compared with fast-twitch muscle

R.M. Murphy and G.D. Lamb 53P

Contractile characteristics of permeabilized muscle fibres from dystrophic dogs

C. van der Poel, K.T. Murphy, J.C.S. Bizario, M.C.R. Costa, M.L. Pinto and G.S. Lynch 54P

Mitochondrial ATP production rate is severely impaired in dystrophic mdx skeletal muscle, and is not influenced by altered calcium concentration

E. Rybalka and A. Hayes 55P

<i>Stretch-induced oxidative damage to mdx muscle: the role of NADPH oxidase</i> N.P. Whitehead, E.W. Yeung, C. Pham and D.G. Allen	56P
--	-----

Free communications: Membrane transport

<i>The effect of Ca^{2+} concentration on response to salinity stress in Chara australis</i> S. Al Khazaaly, M.J. Beilby and V.A. Shepherd.....	57P
---	-----

<i>Thermodynamics of ATP binding to the Na^+, K^+-ATPase</i> A.M. Pilotelle, F. Cornelius, H.-J. Apell, J.M. Matthews and R.J. Clarke	58P
---	-----

<i>A single residue controls the substrate-induced conductance in the glutamine transporter SNAT3 (slc38a3)</i> S. Bröer, H.-P. Schneider, A. Bröer and J.W. Deitmer	59P
---	-----

<i>Identification of early endocytic structures after stimulation of pancreatic acinar cells</i> A. Shukla and P. Thorn	60P
--	-----

<i>AKT and SGK-1 regulate albumin endocytosis via separate signalling pathways</i> D.H. Hryciw, C. Slattery, A. Bolithon, S-J. Conroy, A. Lee and P. Poronnik.....	61P
---	-----

<i>Regulation of the epithelial Na^+ channel by caveolin</i> I.-H. Lee, A. Dinudom, C.R. Campbell, S. Kumar and D.I. Cook	62P
---	-----

<i>Determining albumin degradation rates in the proximal tubule</i> C. Slattery and P. Poronnik	63P
--	-----

<i>Carbonic anhydrase inhibition - a novel therapeutic strategy for renal disease</i> C. Slattery and P. Poronnik	64P
--	-----

Free communications: Smooth muscle and general physiology

<i>Baroreflex-autonomic control of regional coronary blood flow conductance in awake sheep</i> M. Hamut, A.W. Quail, D.B.F. Cottee, P. Seah, D. McLeod, R. Blake and S.W. White	65P
--	-----

<i>Evolutionary aspects of neural control of coronary blood flow</i> A.W. Quail, D.B.F. Cottee, M. Hamut, P. Seah, D. McLeod, R. Blake and S.W. White	66P
--	-----

<i>Integrated autonomic control of the bronchial circulation and 3rd generation airway dimensions during exercise in awake sheep</i> D. McLeod, R. Gunther, P. Seah, A.W. Quail, D.B.F. Cottee, G. Parsons and S.W. White.....	67P
---	-----

<i>Controversy: exercise-induced pulmonary haemorrhage in the horse</i> S.W. White, G. Parsons, G. Mactaggart, D. McLeod, M. Hamut, D.B.F. Cottee and A.W. Quail	68P
---	-----

<i>The effects of maternal renal insufficiency on glomerular haemodynamics and tubuloglomerular feedback in the ovine fetus</i> K.J. Gibson, A.J. Turner, R.D. Brown, A.C. Boyce and A.E.G. Persson	69P
--	-----

<i>Spontaneous Ca and electrical signals in the renal pelvis that drive pelviureteric peristalsis</i> R.J. Lang, H. Hashitani, M. Tonta, H.C. Parkinson and H. Suzuki.....	70P
---	-----

<i>Mapping action potential initiation sites in corneal cold receptors</i> J.A. Brock and R.W. Carr.....	71P
---	-----

<i>Effect of hypoxia on evoked responses in cerebellar Purkinje cells of the mdx mouse</i> D.K. Chelvanayagan, S.I. Head and J.W. Morley	72P
---	-----

Free Communications presented as Posters

<i>Solvent dependence of the photochemistry of the voltage-sensitive fluorescent membrane probe RH421</i> T.H.N. Pham and R.J. Clarke	73P
--	-----

<i>Fitting light saturation curves measured using PAM fluorometry</i> R.J. Ritchie	74P
---	-----

<i>Seasonality of chlorophyll b presence in core complexes of photosystem II from higher plants. A role of photoprotection?</i> P.J. Smith, N. Cox, R. Steffen, J.L. Hughes, E. Krausz and R.J. Pace.....	75P
--	-----

<i>Towards the structure of the $\beta 4$ subunit ectodomain of the human BK K^+ channel</i> O.B. Clarke and J.M. Gulbis	76P
---	-----

<i>Monitoring reaction kinetics of starch by NMR spectroscopy</i> A.C. Dona	77P
--	-----

<i>Muscling in on Paramagnetic NMR</i> N.M. Cordina, J.A. Cooke, M.W. Howell, J.M. Mackay and L.J. Brown	78P
---	-----

<i>Rotation of some mutants of thermophilic F_1-ATPase</i> M.D. Hossain, S. Furuike, Y. Maki, K. Adachi and K. Kinoshita Jr.....	79P
--	-----

<i>Ratchets: Rectifying Brownian motion for transport</i> S.J. Lade and Y.S. Kivshar	80P
---	-----

<i>Modelling Staphylococcus aureus-induced septicemia using NMR</i> R. Plummer, J. Bodkin, T.W. Yau, D. Power, N. Pantarat, T.J. Larkin, D. Szekely, W.A. Bubb, T.C. Sorrell, C.J. Garvey and P.W. Kuchel	81P
--	-----

<i>pH behaviour of the water chemical shift in 1H NMR of red cells with low transmembrane magnetic susceptibility difference</i> T.J. Larkin, W.A. Bubb and P.W. Kuchel.....	82P
---	-----

<i>The ability of the red blood cell to synthesise glutathione in type 2 diabetes mellitus, and the implications for disease management</i> S. Whillier, J.E. Raftos and P.W. Kuchel	83P
---	-----

<i>What are the roles of amino acid transporters B^0AT1 and ASCT2 in kidney and intestine?</i> N. Tietze and S. Bröer	84P
---	-----

<i>What is the physiological role of the neurotransmitter transporter 4 (NTT4) in the central nervous system?</i> S. Balkrishna and S. Bröer	85P
---	-----

<i>The role of the EGF receptor in albumin-induced renal fibrosis</i> Y. Jang, C. Slattery and P. Poronnik.....	86P
--	-----

<i>Gonadotrophin hormones in flying-fox plasma during key reproductive stages</i> A.A. Macdonald, K.-A. Gray and G.M. O'Brien	87P
--	-----

<i>The effect of a selective $\alpha 7$-nicotinic acetylcholine receptor antagonist on endothelium-dependent relaxation in rat mesenteric arteries</i>	
P.S. Chadha, J.D. Moffatt and R. Lever	88P
<i>Synchronization of sinoatrial node cells: the effect of gap junctions</i>	
S. Polwiang and A. Coster	89P
<i>Regulatory volume decrease in isolated cardiomyocytes: differences between freshly isolated and cultured cells?</i>	
J.R. Bell, D. Lloyd and M.J. Shattock.....	90P
<i>Expression of TRPC4 and desmonplakin in mouse hearts</i>	
Y. Chu, D.G. Allen and Y-K. Ju	91P
<i>Cellular mechanisms of STZ-induced diabetic cardiomyopathy</i>	
M-L. Ward, L. Zhang, A.R.J. Phillips and G.J.S. Cooper.....	92P
<i>Structural studies of the phosphorylation domain of cardiac myosin binding protein-C</i>	
J. Hwang, C.E. Oakley, M. Kekic, L.J. Brown and B.D. Hambly	93P
<i>Electrophysiological properties of the hERG mutation E444K, found in familial atrial fibrillation</i>	
S.A. Mann, J.A. Bursill, T. Marciniak, G. Guo, R. Otway, D. Fatkin and J.I. Vandenberg	94P
<i>Preparation of PCR-grade RNA from myocardial biopsy tissue of cardiac surgery patients</i>	
W.T.K. Ip, L.M.D. Delbridge and S. Pepe	95P
<i>Protein trafficking defects as a cause of congenital long QT syndrome</i>	
J.T. Zhao, J. Skinner, A.P. Hill and J.I. Vandenberg	96P
<i>Dynamics of inactivation of hERG potassium channels</i>	
P. Ju, A.P. Hill, T. Marciniak and J.I. Vandenberg	98P
<i>The measurement of inactivation in the human ether-á-go-go related gene channel</i>	
M.J. Perrin, T.J. Campbell and J.I. Vandenberg.....	99P
<i>Evidence for functional coupling between the mitochondria and the L-type calcium channel in the heart</i>	
H.M. Viola, P.G. Arthur and L.C. Hool	100P
<i>The effect of high hydrostatic pressure and TMAO on gating of MscS of E. coli</i>	
E. Petrov, P.R. Rohde and B. Martinac	101P
<i>Rapid incorporation of bacterial mechanosensitive ion channel proteins MscL and MscS into liposomes using a modified sucrose method</i>	
A.R. Battle, E. Petrov, P. Pal and B. Martinac	102P
<i>Are $\alpha 9\alpha 10$ nicotinic acetylcholine receptors a pain target?</i>	
S.T. Nevin, R.J. Clark, H. Klimis, M.J. Christie, D.J. Craik and D.J. Adams	103P
<i>FRET-ing over CLIC1 insertion into the membrane</i>	
S.C. Goodchild, P.M.G. Curmi and L.J. Brown.....	104P
<i>Chloride conductance in the transverse tubular system of rat skinned skeletal muscle fibres</i>	
T.L. Dutka, D.G. Stephenson and G.D. Lamb	105P

<i>The RyR1 SPRY2 domain binds to the DHPR $\alpha 1S$ II-III loop and to the RyR1 binding site for the DHPR $\beta 1a$ subunit</i>	
H-S. Tae, M.G. Casarotto, P.G. Board and A.F. Dulhunty	106P
<i>Effects of calmodulin on protein synthesis in mechanically skinned skeletal muscle fibres of the rat</i>	
D.W. Jame, M. Jois and D.G. Stephenson	107P
<i>Contralateral strength gains following a 4-week progressive resistance exercise programme</i>	
J.A. Sampson, H. Groeller and G. Jacobs	108P
<i>Curve fitting model to quantify the rate and extent of force loss during different phases of fatigue in isolated skeletal muscle</i>	
S.P. Cairns and D.S. Loiselle	109P
<i>Isoform dependent properties of calsequestrin</i>	
L. Wei, N.A. Beard and A.F. Dulhunty	110P
<i>Contractile and fatigue properties of aged fast-twitch EDL muscle from an α-actinin-3 knockout mouse</i>	
S. Chan, S.I. Head, J.T. Seto and K.N. North	111P
<i>Exogenous administration of a PPARδ agonist to dystrophic mdx mice confers no protection from contraction-mediated muscle damage</i>	
S.M. Gehrig, J.D. Schertzer and G.S. Lynch	112P
<i>Contraction-induced changes to intracellular signalling in skeletal muscle</i>	
C. van der Poel, S-A. Tan, S.L. McGee, J.G. Ryall, M. Hargreaves and G.S. Lynch.....	113P
<i>Quantification of calsequestrin-1 and calsequestrin-2 in rat slow- and fast-twitch skeletal muscle</i>	
N.T. Larkins, R.M. Murphy and G.D. Lamb	114P
<i>Protease-activated receptor mediated calcium signaling and cytokine production in cultured c2c12 skeletal muscle cells</i>	
A.J. Bakker, K.A. Burlinson, N. Asokanathan, G.A. Stewart and G.J. Pinniger	115P
<i>TRPC3 and GLUT4 interact during insulin-mediated glucose uptake in adult skeletal muscle</i>	
H. Westerblad, J.T. Lanner, D. Severa, S.L. Zhang, Y. Assefaw-Redda and J.D. Bruton.....	116P
<i>Whole-body cooling during hyperthermia: physiology versus physics</i>	
J.N. Caldwell, A.M.J. van den Heuvel, M.J. Patterson and N.A.S. Taylor	117P
<i>Resistance training increases total AKT, but decreases basal AS160 phosphorylation in individuals with clusters of metabolic risk factors</i>	
C.A. Goodman, I. Levinger, K.F. Howlett, J. Peake, A. Garnham, D.L. Hare, G. Jerums and S. Selig.....	118P
<i>Inhibitors of mitochondrial function disrupt uterine pacemaking</i>	
F.S. Gravina, K. Ryan, M.S. Imtiaz, S.L. Sandow, R. Smith, H.C. Parkinson and D.F. van Helden	119P
<i>Differential inhibitory signalling in the superficial and deep dorsal horn of the mouse spinal cord</i>	
W.B. Anderson, B.A. Graham, P. Jobling, P.A. Tooney, A.M. Brichta and R.J. Callister	120P
<i>Maturation of neuron excitability and membrane conductances in the superficial dorsal horn of the mouse spinal cord</i>	
M.A. Walsh, B.A. Graham, A.M. Brichta and R.J. Callister	121P

<i>Compensatory changes in rapid A-type potassium channel function in the superficial dorsal horn of the spastic mouse; studied in vitro and in vivo</i>	
B.A. Graham, P.R. Schofield, A.M. Brichta and R.J. Callister	122P
<i>Voltage dependent currents in type I and II hair cells and calyx terminals of primary afferents in an intact vestibular preparation</i>	
A.E. Kindig, R. Lim, R.J. Callister and A.M. Brichta	123P
<i>Vestibular effects of ionic and volume changes of inner ear fluid in an isolated preparation of a mouse labyrinth</i>	
E.G. LaMont, R. Lim, R.J. Callister and A.M. Brichta	124P
<i>Inhibitory synaptic transmission in neurons of the medial vestibular nucleus after unilateral labyrinthectomy</i>	
R. Lim, R.J. Callister and A.M. Brichta.....	125P
<i>A horizontal spinal cord slice preparation for studying descending synaptic inputs to neurons in the mouse spinal cord</i>	
J.R. Flynn, M.P. Galea, A.M. Brichta, R.J. Callister and B.A. Graham	126P
<i>Effects of a cognitive task on sway and postural reflex activity during standing</i>	
B.L. Julien and A.P. Bendrups	127P
<i>N-type calcium channels contribute to acetylcholine release from parasympathetic but not sympathetic preganglionic neurons in female mice</i>	
P. Jobling	128P
Symposium: Artificial photosynthesis	
<i>Redesigning photosynthetic charge separation</i>	
S.G. Boxer.....	129P
<i>Artificial photosynthesis and the bio-mimetic production of hydrogen</i>	
R.J. Pace, R. Stranger and S. Petrie	130P
<i>Water-soluble chlorophyll-binding proteins (WSCPs) as well-defined systems by which to probe and modify chlorophyll-chlorophyll and chlorophyll-protein interactions</i>	
E. Krausz, J.L. Hughes, A. Oakley, B. Conlan and T. Wydrzynski	131P
Symposium: Influencing factors in the fate of cardiac myocytes in heart disease	
<i>Spatial and temporal patterns of cAMP production in cardiovascular physiology and pathophysiology using FRET</i>	
R.D. Harvey	132P
<i>Multiple gene mutations altering cell fate and severity of heart disease</i>	
T. Tsoutsman, M. Kelly, E. Tu, L. Lam, C.E. Seidman, J.G. Seidman and C. Semsarian.....	133P
<i>Heart cell attrition early in life – the beginning of the end?</i>	
L.M.D. Delbridge.....	134P
<i>RyR2 peptides mimic Ca²⁺ dysfunction associated with disease mutations and suggest greater susceptibility in atrial than ventricular myocytes</i>	
D.S. Steele and Z. Yang	135P

<i>The effect of mechanical stimulation on cardiac myocytes: The acute and chronic effects of stress and strain</i> E. White	136P
AuPS Invited Lecture &mdash Don Robertson	
<i>Efferent control in mammalian hearing</i> D. Robertson	137P
Symposium: Endocrinology, reproduction and foetal development	
<i>New kids on the block: RF-amides and neuroendocrine control of reproduction</i> I.J. Clarke	138P
<i>Involvement of TTX-resistant Na⁺ currents and protein kinase C in the action of GHRH on primary cultured somatotropes from GH-GFP transgenic mice</i> C. Chen, S-K. Yang, H.C. Parkinson and I.C.A.F. Robinson	139P
<i>Imaging and manipulating the growth hormone axis</i> I.C.A.F. Robinson.....	140P
<i>Growth hormone precursor cells: identification, enrichment, transplantation and differentiation</i> D.A. Lepore, K.R. Knight, G.P.L Thomas, A.J. Hussey, I. Brinas, P. Simmons, W.A. Morrison, C. Chen and P.Q. Thomas	141P
Symposium: EC coupling and fatigue	
<i>Altered cellular Ca²⁺ handling in skeletal muscle fatigue</i> H. Westerblad	142P
<i>Importance of the t-system chloride conductance in muscle excitability and fatigue</i> G.D. Lamb, T.L. Dutka, R.M. Murphy and D.G. Stephenson	143P
<i>Control of skeletal RyR channels by proteins in the SR lumen</i> N.A. Beard, L. Wei and A.F. Dulhunty	144P
<i>Molecular recognition of the disordered dihydropyridine receptor II-III loop by a conserved domain in the type 1 ryanodine receptor</i> Y. Cui, H-S. Tae, N.C. Norris, Y. Karunasekara, P. Pouliquin, P.G. Board, A.F. Dulhunty and M.G. Casarotto	145P
Symposium: Amino acid transport and signalling	
<i>Amino acid signaling to mRNA translation: Central role of mTOR</i> S.R. Kimball.....	146P
<i>Class 3 GPCRs as broad-spectrum L-amino acid sensors</i> A.D. Conigrave	147P
<i>Closing the GATs. Metabolic consequences of blocking GABA uptake</i> F.A. Nasrallah, V.J. Balcar, J.L. Griffin and C. Rae	148P
<i>Neutral amino acid transporters of the kidney and intestine</i> S. Kowalczyk, D.N. Azmanov, J.A. Cavanaugh, H. Rogers, C.G. Bailey, J.E.J. Rasko and S. Bröer.....	149P

Free communications: Cardiac muscle

<i>Hyperinsulinaemia and elevated levels of phosphorylated Akt/PKB in the neonatal Hypertrophic Heart Rat (HHR) precede the onset of cardiac hypertrophy</i> E.R. Porrello, J.D. Schertzer, C.L. Curl, W.F. Meeker, K.M. Mellor, G.S. Lynch, S.B. Harrap, W.G. Thomas and L.M.D. Delbridge	150P
<i>Regulation of ryanodine receptors from cardiac muscle by luminal Ca^{2+} and Mg^{2+}</i> D.R. Laver	151P
<i>In vitro modulation of the cardiac ryanodine receptor (calcium release channel) activity by human homer 1b</i> P. Pouliquin, S.M. Pace and A.F. Dulhunty.....	152P
<i>Visualization of the 3-D distribution of proteins involved in cardiac excitation-contraction coupling using a novel optical approach</i> I.D. Jayasinghe, M.B. Cannell and C. Soeller	153P
<i>Analysis of ryanodine receptor clusters in rat and human cardiac myocytes at high optical resolution</i> C. Soeller, R. Gilbert, D. Crossman and M.B. Cannell.....	154P
<i>Angiotensin II mediates cardiomyocyte growth signalling via ErbB4</i> H. Chan, N.J. Smith, A. Agrotis, R.D. Hannan and W.G. Thomas.....	155P
<i>Hypertrophic cardiomyopathy causing mutations in myosin binding protein-C alter PKA phosphorylation</i> C.E. Oakley, J. Hwang, L.J. Brown, M. Kekic, P.G. Fajer and B.D. Hambly	156P
<i>Novel actin/tropomyosin filaments that regulate glucose uptake and insulin secretion</i> A.J. Kee, R. Szokolai, N. Vlahovich, R.G. Parton, D.E. James, G.J. Cooney, P.W. Gunning and E.C. Hardeman	157P

Free communications: Ion channels

<i>Relative counter-ion permeation in anion-selective glycine receptor channels did not vary between two different anions, supporting an ion pair mechanism</i> S. Sugiharto, A.J. Moorhouse, T.M. Lewis, P.R. Schofield and P.H. Barry	158P
<i>External divalent ions decrease counter-ion permeation in anion-selective glycine receptor channels without changing the minimum pore diameter of the channel</i> S. Sugiharto, T.M. Lewis, A.J. Moorhouse, P.R. Schofield and P.H. Barry	159P
<i>MA-stretch residues are critical for ion conduction of 5-HT_{3A} receptors</i> J.E. Carland, M.A. Cooper, M.R. Livesy, T.Z. Deeb, T.G. Hales, J.J. Lambert and J.A. Peters	160P
<i>Function of the conserved cystine-loop in Cys-loop ligand-gated ion channels</i> M.L. Tierney and T. Luu	161P
<i>Functional characterisation of ten myotonia-associated mutations of the hClC-1 chloride channel</i> A.H. Bretag, L.L. Ma, G.Y. Rychkov and P.L.Y. Fung.....	162P
<i>The effect of mutation E232Q and clofibrate acid derivatives on gating in the human skeletal muscle chloride ion channel, ClC-1</i> J.M.E. Cederholm, G.Y. Rychkov and A.H. Bretag.....	163P
<i>Novel modulation of Na_v channels in dorsal root ganglion neurons by veratridine</i> J. Ekberg, D.J. Adams, S. Kumar and P. Poronnik	164P

<i>Structural features of the lolitrem family of fungal alkaloids important for inhibition of large conductance calcium-activated potassium (BK) channels</i>	
J.E. Dalziel, W.I. Imlach, J. Dunlop and S.C. Finch	165P

Free communications: Exercise physiology

<i>Effect of high-intensity, interval exercise on signalling proteins and gene expression in human skeletal muscle</i>	
M. Hargreaves, S.L. McGee, K.F. Howlett, R.J. Snow, A. Garnham and M.J. Gibala	166P

<i>The effects of hydration and aerobic fitness on physiological strain and endurance performance</i>	
T.L. Merry, P.N. Ainslie and J.D. Cotter	167P

<i>nNOS is necessary for normal increases in glucose uptake during contraction of skeletal muscle</i>	
K. Linden, J.G. Ryall, C. van der Poel, J.D. Schertzer, G.S. Lynch and G.K. McConell	168P

<i>Rat skeletal muscle 3-O-MFPase activity is not decreased by fatiguing in vitro electrical stimulation</i>	
C.A. Goodman, A. Hayes and M.J. McKenna	169P

<i>Iron accelerates skeletal muscle fatigue at 37°C</i>	
T.F. Reardon and D.G. Allen	170P

<i>Intra-segmental distribution of emotional sweating</i>	
C.A. Machado-Moreira and N.A.S. Taylor	171P

Free communications: Biophysics & spectroscopy

<i>‘remedi’: Meeting the measurement needs of regenerative medicine</i>	
M.L. Mather, J.A. Crowe and S.P. Morgan	172P

<i>X-ray diffraction as a tool to study the arrangement of cellulose molecules in plant cell walls</i>	
C.J. Garvey, O. Paris and R. Gillespie	173P

<i>Novel signalling in mouse embryonic stem cells alters the pluripotent state</i>	
A.C. Lonic, F. Felquer, N. Hamra and M.B. Morris	174P

<i>Does N-acetylcysteine act as an intracellular cysteine precursor in human erythrocytes?</i>	
J.E. Raftos, S. Whillier and P.W. Kuchel	175P

<i>Free energy simulations of potassium channels - KcsA, Shaker and HERG</i>	
S. Kuyucak and T. Bastug	176P

<i>In vivo measurement of hepatic lipid composition by proton magnetic resonance spectroscopy</i>	
N.A. Johnson, D.W. Walton, T. Sachinwalla, C.H. Thompson, K. Smith, P. Ruell, S.R. Stannard and J. George	177P

Free communications: Cardiovascular/heart

<i>Evidence for direct regulation of the cardiac L-type Ca²⁺ channel during changes in thiol redox state</i>	
W.A. Macdonald, H.M. Viola, B. Martinac and L.C. Hool	178P

<i>“Battle of the Clocks” – Sinoatrial pacemaking through plasmalemmal ionic currents or intracellular Ca²⁺ release</i>	
M.S. Imtiaz and D.F. van Helden	179P

<i>Impaired post-ischemic functional recovery in primary cardiac hypertrophy is accentuated in female rats</i>	
J.R. Bell, E.R. Porrello, S.B. Harrap and L.M.D. Delbridge	180P

<i>Diet high in N6 PUFA lowers cardiac membrane N3:N6 fatty acid ratio and increases atrial mass and cardiomyocyte size</i>	
S.E. Miller, C.E. Huggins, M.L. Theiss, P.L. McLennan, S. Pepe and L.M.D. Delbridge	181P
<i>Effect of hexarelin on transient outward potassium current in rat ventricular myocytes</i>	
Q. Sun and C. Chen.....	182P
<i>Antibody Microarrays: A new tool for testing leukocytes for inflammation</i>	
A. Brown, J-D. Lattimore, M. McGrady, D. Sullivan, W. Dyer, F. Braet and C.G. dos Remedios	183P
The Physiological Society (UK) Exchange Lecture - Mark Dunne	
<i>Congenital hyperinsulinism: from bench to bedside and back?</i>	
M.J. Dunne, R.M. Shepherd and K.E. Cosgrove	184P
